11 - Assignment (due Monday October 17)

Problem 1

Import `http://manctsui.github.io/datasets/StudentsPerformance.csv` into SAS and compute the average test (overall math/reading/writing, or just math if you want) score of students who have completed test prep.

Problem 2

Let μ_0 be the answer you found in Problem 1.

Run a 1-sample t-test to determine whether the average (overall math/reading/writing, or just math if you want) test score of students who have not completed test prep is equal to μ_0.

Make sure to check all hypotheses for t-test. (Write a few sentences about these.)
